## POLYPROPYLENE MESH

**Product Name:** Polypropylene Mesh - SURUMESH®

**Item Code:** 1017

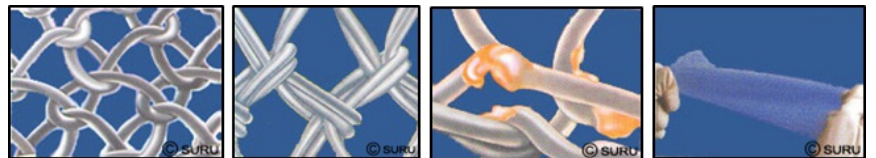

**Features :**

### Non-Absorbable Polypropylene Mesh :

- Mesh constructed of knitted monofilaments of extruded 100 % polypropylene.
- Mesh is constructed from polypropylene resin monofilament without coloring, additives and stabilizers.
- Polypropylene mesh affords excellent strengths, durability and surgical adaptability, along with maximal porosity for necessary tissue in growths.
- The mesh is approximately 0.35-0.65 mm thick and is a highly flexible and biocompatible material

### Characteristics of Polypropylene Mesh :

<ul style="list-style-type: none"> <li>• Offers long stability and superior performance</li> <li>• Unique knitting design</li> <li>• Non-absorbable, Inert and Porous</li> <li>• Permanent Support</li> <li>• Bio compatible</li> <li>• Strong, elastic &amp; transparent mesh.</li> <li>• Multidimensional elasticity</li> <li>• High burst strength and tensile strength</li> </ul>	<ul style="list-style-type: none"> <li>• Ideal porosity for high visibility &amp; colonization</li> <li>• High strength &amp; burst resistance for permanent support</li> <li>• Flexible for any anatomic placement</li> <li>• No shrinkage &amp; provides long term material stability</li> <li>• Delivered sterile in sealed double pouch</li> <li>• Can be cut to any dimensions and shape without unraveling</li> </ul>

ITEM CODE	DIMENSION	PACKING
SR2. 6.11	6 cm x 11 cm	6 sheets / box
SR2. 7.6.15	7.6 cm x 15 cm	6 sheets / box

SR2.15.15	15 cm x 15 cm	3 sheets / box
SR2.30.30	30 cm x 30 cm	1 sheets / box
