SURU INTERNATIONAL PVT. LTD.

DOG TUBE

Product Name: Vet – Dog Tube

Item Code: 7003

Features :

- A dog catheter is a flexible medical device designed for urinary catheterization in dogs. It is made from soft materials to minimize discomfort during insertion
- The catheter's flexible structure allows for a more comfortable and less invasive experience, especially for dogs with sensitive anatomies or anatomical challenges
- Dog catheters are available in various diameters to suit different breeds and sizes. They feature a smooth, rounded tip to reduce trauma to the urethra during insertion.
- These catheters are commonly used for short-term urinary relief or to collect sterile urine samples from dogs.

Available configuration:

- Size : FG 4 (OD 1.30 mm) Length 500 mm
- Size : FG 5 (OD 1.60 mm) Length 500 mm
- Size : FG 6 (OD 2.00 mm) Length 500 mm
- Size : FG 7 (OD 2.30 mm) Length 500 mm
- Size : FG 8 (OD 2.67 mm) Length 500 mm
- Size : FG 9 (OD 3.00 mm) Length 500 mm
- Size : FG 10 (OD 3.33 mm) Length 500 mm
